Dear Sir:

I have long been a listener to both A.M. and F.M. Radio Stations. In my life I have lived in Tampa, FL, Atlanta Ga, and Nashville Tn. And have traveled through many other major Metropolitan areas. None of the stations , regardless of format, has provided a decent weather forecast or traffic report for over 20 years. There traffic reports last less than 30 seconds but include 2 - 3 minutes of advertisements.

I have subscribed to XM Radio for over a year, because of better sound quality, and and no annoying Disc Jockeys, or long commercial blocks, to interfere with my enjoyment of my music. XM also, provides me with access to better news sources.

In my current job, I travel and have found XM's Traffic and weather reports to be a valuable resource.

If A.M. and F.M. stations would provide a better product, and stop trying to limit my First Amendment Rights to listen to what I choose. I will not go back to their limited, outdated technology.

Please, leave X.M. alone
